Touchstone Selects Evolved for Digital Solution

Nashville, TN –October 4, 2004 –Touchstone Medical Imaging, LLC, a leading provider of diagnostic imaging services in the US, has chosen Evolved Digital Systems, the leading provider of medical image management technologies, as its digital partner.

“We currently manage 17 imaging centers across the country, and we’ll be adding more,” said Todd Cato, Touchstone Vice President of Operations. “Whenever there’s not already a legacy system in place, our preferred choice will be to deploy the Evolved solution.”

Touchstone has already installed Evolved solutions in four imaging centers, including two high-volume, multiple modality sites: Hermitage Imaging Center in Nashville, TN; and Tyler Open MRI and Diagnostic Services in Tyler, TX. Its most recent installation at Village Imaging Center in Erie, PA was completed in just 70 days from contract signing to live launch.

“We know who’s out there, and we’ve chosen to use Evolved in every market we can,” said Cato.

The Evolved all-in-one digital solution helps hospitals and imaging centers dramatically improve efficiency, turnaround time, and patient care. Because less onsite infrastructure is required, Evolved typically cuts a facility’s up-front capital investment by half. Its services and technologies include the web-based Picture Archiving Communication System (PACS), secure offsite archive, online transcription, workflow, scheduling, and seamless interface with any existing information system, all managed around the clock by Evolved.

“We’re now closely studying implementation of their solution in two large urban areas where we have multiple sites,” said Cato. “It makes sense to get all these locations on the same backbone so physicians throughout the region can view images and reports remotely through a single solution.”

Cato notes that his company has no IT department. "Evolved makes the ideal partner for us. They take care of everything, from ordering the T-1 lines to setting up the network. They provide training, support and ongoing maintenance, plus online transcription. It's hard to find a transcription team as reliable and fast as Evolved. Other companies offer software, but nobody else offers the end-to-end, turnkey service."

John Southcott, President and CEO of Evolved, said, "We're delighted to be working with such a respected name in medical imaging as Touchstone. Our aim is to work in partnership, to deliver dependable service and leading-edge technology that will translate into bottom-line results and growth. When our clients succeed, we succeed."

About Touchstone Medical Imaging, LLC

Touchstone is a privately held company based in Brentwood, TN, managing medical imaging facilities in six states. The centers under its management provide a wide range of imaging services in a comfortable out-patient environment. Services include MRI (Magnetic Resonance Imaging), CT Scan (Computed Tomography), Ultrasound and many others.
