Evolved Digital Systems Announces View² Imaging Product Line

Nashville, TN April 30, 2004 — EVOLVED Digital Systems, the leading provider of integrated image and information management solutions for the medical industry, announced today that it has released its new View² Imaging product line. A web-based, fully featured, combined radiology and cardiology PACS solution will now be available to Evolved customers.

View² is fully integrated with the EVOLVED suite of digital services. View² PACS enables hospitals, imaging centers and physicians' offices to capture X-rays, ultrasounds, CAT-scans and many other medical images in digital format rather than traditional film. Evolved integrates these digital files into a networked solution for physicians and caregivers and enables them to view images and patient data more rapidly. This improves the speed of diagnostics and patient care.

"We now can provide a complete end-to-end solution for our customers," stated John Southcott, President & CEO of Evolved. "In addition, by offering a combined cardiology and radiology platform we are able to offer even greater value and cost efficiencies to health care facilities. This adds to our already outstanding value proposition. View² will replace and supplement our existing View cardiology PACS offering. Existing View cardiology customers now have an excellent long term upgrade path."

Configuration, installation and long-term support will be provided by Evolved. The View² product line is provided through an OEM (Original Equipment Manufacturer) agreement with ScImage, Inc. Evolved will continue to support radiology PACS solutions from Agfa and GE Medical Systems.

"By selecting PICOMEnterprise's core technology, Evolved Digital Systems can now provide their customers with a single solution that can address the needs of both their cardiology and their radiology customer base while continuing to leverage their existing investment in their data center," states Sai P. Raya, Founder and CEO of ScImage. "I am positive that the combination of the Evolved sales and support organization and ScImage's technology will benefit both organizations."

FOR IMMEDIATE RELEASE

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company, headquartered in Los Altos, California. ScImage is a global leader in the development and manufacturing of advanced medical imaging technology and information management workflow solutions for radiology and cardiology. ScImage's mission is to be the True Enterprise PACS Company by providing a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of the ScImage's image and information management system is PICOM, a Web-enabled technology that works independent of modalities and departments to deliver diagnosis-enhancing software, seamlessly integrated multi-modality image and information management, archive, offsite disaster recovery and telemedicine functionality. PICOM, PICOMOnline, EPF, and NetraMD are trademarks of ScImage, Inc. For more information on ScImage, visit their website at www.scimage.com or call 1-866-SCIMAGE.

About Evolved

With over 110 customer locations across North America, Evolved has become a leading healthcare technology solutions company. Its services and enabling technologies transform hospital and clinic imaging departments from manual to digital-based systems, improving efficiency, turnaround time, and patient care.

Evolved is a publicly traded company listed on the Toronto Stock Exchange. Corporate headquarters are based in Laval, Quebec. U.S. offices are located in Brentwood, Tennessee. For more information, contact EVOLVED at 877-5EVOLVED or visit the company website at www.evolveddigital.com
