Gibson General Hospital Goes Digital with the Evolved Solution

Nashville, TN – October 25, 2004/CNW/ (TSX:EVD) - EVOLVED Digital Solutions, the leading provider of integrated image and information management solutions for the medical industry, recently welcomed Gibson General Hospital of Princeton, Indiana as its newest partner. This expands the company's growing list of hospital installations across the US.

Gibson General Hospital is a 25-bed critical access acute care hospital with a 45-bed skilled nursing facility, providing comprehensive medical care for two rural counties. Larger hospitals in the area were already equipped with Picture Archive Communication Systems (PACS) for digital medical imaging. To stay competitive, maintain referral volume, and to offer a more effective and efficient service, Gibson chose to deploy the Evolved suite of web-based, fully managed digital technologies, including integrated department workflow, offsite archive, online dictation, 24/7 support and custom interface.

"We'd heard that Evolved had a good solution for community hospitals with limited resources," said Karen Woolsey, Director of Radiology for Gibson. "Their offsite archive and round-the-clock support appealed to us because it meant we could move quickly to an almost filmless, paperless environment without adding staff or making a large capital investment."

“Evolved is not just another RIS/PACS company,” said John Southcott, President and CEO of Evolved. “We deliver an affordable, web-based, fully managed solution that addresses the challenges and opportunities faced by community hospitals and imaging centers. Evolved goes beyond hardware and software to integrate the people, process and technology our clients need for faster patient diagnostics.”

“I sense lot of pride in the department because of our new technology,” said Woolsey. “Our physical therapists love the new system because their PCs are linked, and they can look at images while they’re working with a patient. Our emergency room doctors can view images online before the patient is even returned to the ER. The Evolved customer support team works closely with us, and they’re very receptive to our suggestions for future upgrades. This new system shows our community that Gibson is a progressive hospital, and best of all, we’ve made patient results and images more accessible to their physicians.”

About Evolved

With over 100 customer locations across North America, the Evolved solution for radiology and cardiology imaging management transforms hospitals and imaging centers from manual to digital-based systems, improving efficiency, turnaround time, and patient care. The solution dramatically improves productivity and typically cuts a hospital’s capital investment by half. A recent hospital study showed Evolved customers realize an average return on investment of 123% within the first year and 142% annualized thereafter.

Evolved Digital Systems Inc./Systems Evolution Digitale Canada Inc. is a publicly traded corporation listed on the Toronto Stock Exchange. Corporate headquarters are based in Laval, Quebec. US offices are centrally located in Nashville, Tennessee. For more information, contact EVOLVED at 877-5EVOLVED (1-877-538-6583), or visit the company website at www.evolveddigital.com.
